

Synchronization

The times in which we find ourselves or unprecedented of the amount "effort" which is being generated to synchronize the life of man (in general synchronizing systems). This has long been used in the military for example for operational purposes. One system known from the army (in the aviation as UTC¹- time), is the so-called "Zulu Time" which means that 01:00 Amsterdam Zulu is 01:00 Honolulu Zulu time.

Synchronizing watches for a military operation (1944).

The idea is not new from a biblical perspective when you read about the Genesis Tower of Babel, all to make life easier so the people said (Gen. 11: 4) – let build us a city ... so we won't be scattered all over the earth. This synchronization will not cease until it is in all areas (social) media, finance (IBAN²), time (GPS³), health (patient file) etc. What is the answer to the future scenario? In the book of Joël a powerful promise is described which is not linked from the human heart (will) but from God's Spirit (will). In Joël 2: 28-32, the outpouring of God's Spirit on all flesh is described. All this at a time of great signs (2:30) where the Spirit of God will ensure that a revival will generate the benefit of dreams and visions to the people. From this, the goal of the human heart emerges namely, does it want life by its own way or want to see and follow God(2:32 Joël / 2 Tim. 2: 2).

Wish you God's Merci and Truth (Prov.3: 3)!
